SHELF LIFE FOR EASY DISTRIBUTION

You do not have to scramble to find freezer space for any items not picked up. The cookie dough can be stored at room temperature (77° or below) for up to 21 days.

Q: What makes your cookie dough shelf stable?

A: It's in the ingredients. Lots of cookies are made with egg and butter, they are also the ingredients where bacteria can grow. We use whey protein, which is a common egg substitute in baking and a Certified Sustainable palm oil shortening. These ingredients not only make our cookies Shelf Stable but also taste great!

Q: Do you add preservatives to your cookie dough?

A: No, we do not add preservatives to our cookie dough. Some ingredients that we purchase may contain preservatives. Examples include chocolate products which almost always have soy lechithin added and natural egg products will contain citric acid.
